

It is my understanding that the NAB is seeking to limit XM Radio's capability regarding the broadcast of local traffic and weather. XM traffic is a service I use daily in the Houston area simply because there is no other radio station that comes close the detail provided by their reporting. There are obviously more important issues you could concern yourself with. Listed below are a few to keep you busy:

Bill Clinton..check on his girlfriends

Bin Ladin....see if Clinton's girlfriends are with him.

gay marriage....Hilary may be voting for this one.

Leave XM Radio alone.
